Work Experience

Freelance — Wayne, NJ
Mid-Level Front-end Web Developer — January 2022 | Present

Qualcomm — San Diego, CA
Mid-Level Front-end Web Developer — March 2020 | January 2022

- Converted CCM, an innovative automotive management web application, from Angular to React with Redux and delivered an interactive demo to clients in 6 months.
- Administered two other front-end projects, ConfigTool and Carota, further building on CCM and delivered functional demos to our clients which increased the support for our team's projects.
- Occasionally took on the role of lead developer which included delegating tasks and responsibilities, conducting code reviews, and daily status checks for in-progress tasks.
- Engineered the deployment of our front-end projects with over 10+ environments across 5 different accounts in AWS and managed build releases to those environments.

Walmart — Bentonville, AR
Front-end Web Developer — February 2019 | March 2020

- Developed PCI compliant fin-tech web applications for business users using React for the front-end and Node.js to build Rest APIs that pull data from MariaDB and IBM DB2 databases.
- Migrated a business-critical application from Angular to React so that we can both reuse its components in other projects and have it be better aligned with our tech stack.
- Proposed and implemented UX and UI redesigns that would help our applications scale with the introduction of new features.

Network Devices — Moonachie, NJ
Front-end Web Developer — September 2017 | February 2019

- Developed and launched an e-commerce website for Network Device Inc. to drive sales of over $370,000 and placed each product on the website on great standing with Google Shopping.
- Rewrote the existing back-end and front-end code of Lezzettar website using Node.js and React.js and deployed the website as a web app on AWS which has increased the page load speed by 44% and increased customer retention by 27%.
- Liaise between Vodanet Systems and SellerCloud to integrate the inventory/e-commerce management software with Perfex CRM to increase our customer engagement rate by 20%.
